Integrating business with technology
CADD Emirates empowers organizations by providing them a wide range of IT Services that focus on technological solutions rather than mere systems implementation.

With an in-depth understanding of the diverse needs of organizations, CADD Emirates creates tailor-made solutions that’s best suited for a clients’ environment. Reason why, its range of services is a complete suite of IT solutions customized for unique, individual requirements which are:

- Advisory Services
- Resource Augmentation
- Managed Services
- Support Services

Advisory Services
CADD Emirates plays a pivotal role in first and foremost understanding and analyzing the client’s technological requirements in relation to its business. Advisory services are formulated on the clear understanding of the business model and the impact they can have on the future of the company.

Partnering with the world’s best global consulting firms, CADD Emirates offers advisory services that are tailor-made and best suited for the client’s environment.

- Development of IT road maps to steer the client in the right direction
- Devising a clear IT strategy to support relevant business issues
- Helping organisations employ global practices and meet regulatory compliances
- Advising clients on on-shore and off-shore projects

Virtual IT Infrastructures are the latest creation that benefit organizations in different ways. Virtualization helps enterprises reduce capital expenses through server consolidation and improve operating expenses through optimization.

CADD Emirates helps its clients develop a virtual infrastructure by setting up a single physical machine that helps connect multiple virtual machines functioning on different operating systems and applications.

Disaster Recovery

Power outages, virus attacks and patch failures can be a threat to data security and vital information. Even a man-made disaster can result in business downtime, drastically affecting productivity and access to vital information. CADD Emirates provides Disaster Recovery solutions that protect data and secures information, ensuring business continuity and resiliency most required by today’s organizations.

Offering consultancy solutions and ongoing support for enterprises, CADD Emirates range of services include design and construction of Disaster Recovery (DR) sites, hardware, networks and software for Continuous Data Protection, Synchronous and Asynchronous Replication, Cloning and Snapshots.

Storage Solutions

Data protection is vital to an organization’s information security. With an ever increasing database, organization’s demand protection and easy access to information at all times. CADD Emirates provides basic to enterprise level storage solutions, helping clients maintain their database and securing vital information. They deploy the world’s best solutions for the archiving and storage of data, ensuring the protection of digital assets and integrity of its clientele.

CADD Emirates offers a comprehensive range of hardware and software solutions for IT infrastructure for large and medium enterprises across different industry segments. It enjoys easy access to the latest products and solutions from leading OEMs and ISVs aptly supported by a professional team of qualified IT specialists to deliver a scalable IT infrastructure that fits an organization’s business model and meets their technological requirements.
WIRELESS: Wireless technology is gaining more and more importance in IT communication. The rapid advance in wireless technology has transformed the way organizations function and interact with its employees and customers alike.

The recent trend of ‘bring-your-own-device’ (BYOD) is ushering a new trend and setting a new pace in the business world, bringing about a significant change in wireless communication. The rapid advancement in wireless technology is encouraging employees to use their personally-owned devices to interact, function and speed up productivity in a fast-moving, demanding business environment.

STRUCTURED CABLING: CADD Emirates provides structured cabling solutions for Data Centers, Local Area Networks, Wide Area Networks and converged low voltage applications, which are best suited for medical facilities, call centers, hotels, condominiums, apartments, office buildings, educational campuses, government centers and convention centers.

CCTV: CADD Emirates designs and implements high performance CCTV solutions, digital and analogue storage solutions & network based video surveillance solutions for corporates, hotels and government entities which are suited for both, indoor and outdoor coverage under normal and extreme weather conditions.

Portfolio of services:
- Structured Cabling
- Switching & Routing
- Wireless Solutions
- CCTV Solutions
- IP Telephony
- Datacenter Consulting & Set-up
- Performance Management
- IT Risk Management
- Information Security
- WAN Optimization

Networking & Security

CADD Emirates helps organizations to create a cost-effective, scalable and flexible IT system infrastructure using industry-leading technology and paradigms. This helps in improving the efficiency of IT systems, maximizing the productivity of hardware and data communication networks and monitoring the performance of networking and data transmission.

Information accessibility and data security is of prime importance to any organisation. In order to maintain the right balance between the two, it takes a robust and reliable IT infrastructure to keep it safe and secure. CADD Emirates specialises in providing networking and security solutions that help in data security and optimization and reduces transmission errors thereby ensuring smoother flow of information across the organisation’s network. This helps in preventing data loss, ensures information security and also saves bandwidth costs and infrastructure investments.

Partnering with global firms and enjoying long-standing relationships with different OEMs, CADD Emirates offers ‘best of the breed technology’ for addressing the large scale requirements of networking products and security solutions.

CADD Emirates provides networking and security solutions for organizations that ensure data security, smoother flow of information across networks and reduction of transmission errors.

SWITCHING & ROUTING: Switching & Routing minimizes bandwidth use between data centers by using the most appropriate compression algorithm and reduces the transmission of redundant data. This results in better application performance and improved backup and recovery times. WAN optimization can also reduce or defer the costs of linking data centers and reduces the communication cost.

As part of its operational services, HOSTECH has devised an accurate IT structure to effectively manage the hotel property with the required Point-of-Sale Systems, Digital Signages, IPTV, Back Office Management, Restaurant Reservations, Banqueting and Catering Services and F&B Management.

As for guest services, it effectively structures guest services management, customer relationships, event ticket management, mobile printing services, hi-speed internet, office and communication solutions, conferencing and networking solutions.

It also manages the leisure activities of hotels by developing efficient systems and monitoring spas, golf clubs, health clubs and memberships.

HOSTECH has launched the world renowned Telephone Optimization and Yield Management Solution. This innovative technology is a zero investment concept to hotels to yield higher revenue in telephone and related services. HOSTECH has successfully implemented the solution in renowned hotel chains across the GCC.

HOSTECH has successfully implemented the solution in renowned hotel chains across the GCC.

- Hotel Management System
- Guest Room Internet Software
- Call Accounting, Voice Mail Systems
- Guest Service & Tablet Solutions
- Hospitality Digital Signage Software
- IPTV for Hotels
- Point-of-Sale Systems
- Restaurant Reservation System
- Customer Response Management
- SPA & Health Club Management Software
- Mobile Printing Solutions
- Digital Newspaper System
- Telephone Yield Management Software

With the changing tastes and demands of customers, HOSTECH is well-equipped to handle the future requirements of the hospitality sector.

CADD Emirates specializes in hospitality solutions through HOSTECH - a business wing that solely manages the IT requirements of the hotel industry.

With an in-depth understanding of the hospitality industry, HOSTECH offers a buffet of services through a comprehensive portfolio of technological solutions that help hotels manage their property, guests’ services, reservations, memberships, communication network, provide personalized services, monitor staff productivity and thereby enhance productivity.

Today HOSTECH has developed successful IT recipes for local and multinational hotel chains across UAE, Qatar, Bahrain, Oman, Jordan, KSA, Lebanon, India, Maldives, Mauritius and Egypt.

A clear understanding of the different sections within a hotel helps HOSTECH in developing the right IT solutions, thereby enhancing efficiency and maximizing productivity.

CADD Emirates offers premium IT products that have been successfully implemented across the hospitality sector.

‘Call Accounting’ is one of the most accepted solutions at leading hotel chains that works seamlessly with PMS and PABX systems enabling efficient and flexible management of communication charges and service usages, voice messaging and Interactive Voice Response (IVR).

Automated Guest Service System and Inter Department Work Order System is another premium offering that enhances guest request fulfilment systems delivering specific statistics of individual guests and guests on the whole. The guest system covers multi-language systems, self-service mobile application, maintenance services for guest rooms and communication through smart handheld devices like iPhones, iPads, Blackberry amongst others.
